AMENDMENTS TO THE EXPLANATORY NOTES CONCERNING POLYMER NAMES

(Item II.7 on Agenda)

Reference documents :

42.248 (RSC/18)	NR0045E1, Annexes A/18 and D/13 (RSC/19 - Report)
42.500, Annex B/13 (RSC/18 - Report)	NC0017E1 (HSC/23)
42.196 (SSC/14)	NC0090E2, Annexes F/1 (paras. 63 to 65), N/11 and O/6 (HSC/23 - Report)
42.850, Annexes A/6 and C/3 (SSC/14 - Report)	NR0054B1 (RSC/20)
NR0018E1 (RSC/19)	NR0072E2, Annex C (paras 37 and 38) (RSC/20 – Report)

I. BACKGROUND

1. The Review Sub-Committee (RSC) at its 20th Session (September 1999) examined the amendments to the Explanatory Notes concerning polymer names following from the adoption of the proposed amendments to the Harmonized System under the Article 16 procedure. It was noted, however, that there was an inconsistency in respect of some polymer names whose unit or monomer was represented by a general term.
2. In this connection the Delegate of Canada informed the RSC that Canada had submitted a note to the Secretariat with regard to this question. Following the receipt of this note on 6 August 1999, the Secretariat decided to forward it to the Scientific Sub-Committee. The Canadian submission, which is reproduced in Annex I to this document, is entitled "Proposed Amendments to the Explanatory Notes and the Compendium of Classification Opinions Concerning Polymer Names".

II. SECRETARIAT COMMENTS

3. The Secretariat would like to first recall that the original Canadian proposal to amend the Nomenclature and Explanatory Notes concerning polymer names (Doc. 41.480 – RSC/16) was examined by the Scientific Sub-Committee (SSC) in two stages as follows :

File No. 2693

For reasons of economy, documents are printed in limited number. Delegates are kindly asked to bring their copies to meetings and not to request additional copies.

- (i) The first stage, involving amendments to the Harmonized System and the Explanatory Notes to eliminate potential classification problems in the French texts, was considered by SSC/13 and the results were subsequently adopted by the Harmonized System Committee (HSC) at its 21st Session (Annex N/5 to Doc. 42.100).
 - (ii) The second stage was considered by SSC/14 and the results were subsequently adopted by the Harmonized System Committee at its 23rd Session (Annex O/6 to Doc. NC0090B2).
4. Secondly, the Secretariat had noticed that among the amendments adopted during the first stage (HSC/21), some polymer names represented by general terms had been amended in the French version but not in the English (see paragraph 6 of Doc. NR0054B1 (RSC/20) and paragraph 37 of Annex C to Doc. NR0072E2 (RSC/20 – Report)). The Secretariat considers that the SSC should review these amendments and, if necessary, should withdraw them, taking into account the decision taken at SSC/14. The amendments at issue are reproduced in Annex II to this document.
5. Thirdly, the Secretariat has reproduced in Annex III a compilation of (i) the amendments proposed by Canada (see Annex I), (ii) the amendments referred to in paragraph 4 above (see Annex II) and (iii) any other amendments suggested in relation to the considerations set out below. To avoid any ambiguity, the Secretariat has refrained from referring to references as “French text only” or “Texte anglais seulement” and has, consequently, reproduced the amendments in both language versions in Annex III.
6. Before going into detail vis-à-vis the amendments proposed by Canada, the Secretariat would like to remind delegations that the Scientific Sub-Committee agreed to bring polymer names into conformity with the chemical nomenclature of the IUPAC with respect to polymers whose unit or monomer was represented by a specific term, but not polymers represented by a general term (paragraph 2 of Annex A/6 of Doc. 42.850 (SSC/14 – Report)). In its comments set out below the Secretariat has followed this principle. The separate issues raised in the Canadian submission are referred to as items “A.1”, “A.2”, etc. in the following paragraphs.

Canadian submission – General

7. The main issue raised by the Canadian paper (see Annex I) relates to the decision taken by the SSC at its 14th Session not to amend the names of the polymers whose unit or monomer was represented by a general term. The Secretariat has noticed, however, that some of the proposed amendments seem not to be in line with the decision taken. Nonetheless, the Secretariat has reproduced them in Annex III, but in square brackets pending the outcome of the discussions.

Poly(vinyl acetals) – Item A.1

8. The Canadian Administration suggests replacing the terms “polyvinyl acetals” (English version) and “acétals polyvinyliques” (French version) in the Explanatory Note to heading 29.11 by “poly(vinyl acetals)” and “poly(acétals de vinyle)”, respectively, to align the Explanatory Notes on the terminology already adopted by the Sub-Committee in the French version of the Explanatory Notes to headings 39.05 and 39.07 (SSC/13).

9. At this point, the Secretariat would like to clarify that the term "polyvinyl acetals" in the English version of the Explanatory Notes to headings 39.05 (fourth paragraph, page 605) and heading 39.07 (first paragraph, item (1), page 607) has not been amended. If the Sub-Committee adopts the Canadian proposal to amend the Explanatory Note to heading 29.11 as indicated in paragraph 8 above, the Secretariat suggests amending the Explanatory Note to headings 39.05 and 39.07 accordingly. Pending the outcome of the discussions, the Secretariat has placed a proposal to that effect in square brackets in Annex III to this document.

Poly(acrylic esters) – Item A.2

10. The Canadian Administration suggests replacing the term "polyacrylic esters" by "poly(acrylic esters)" in the English version of the Explanatory Notes to headings 32.09 and 39.07. The Secretariat has placed the proposed amendments in square brackets in Annex III pending the outcome of the discussions based on the principles referred to in paragraph 6 above. If the Sub-Committee decides not to amend the terms in the English version, the Secretariat suggests withdrawing the amendments already made to the French version of the Explanatory Note to heading 39.07, item (5), on page 607 (Doc. 42.100, Annex N/5).

Polyethylene glycol – Items A.3 and A.4

11. The Canadian Administration has also expressed its concerns with regard to the term "polyethylene glycol". At its 14th Session, the SSC dropped the proposed amendments with regard to this term considering them as polymers whose unit or monomer was not represented by a specific term. However, Canada is of the view that these are polymers of oxyethylene and as such are represented by a monomer unit with a specific term. Thus Canada proposes that the references to this polymer should be reinserted and aligned on the adopted text for subheading 3404.20.

12. The Secretariat would like to point out firstly that the text of subheading 3404.20 was amended to read : "of poly(oxyethylene) (polyethylene glycol)" (French : "de poly(oxyéthylène) (polyéthylène glycols")", bearing in mind that heading 34.04 covers certain waxes. Secondly, it should be noted that the relevant texts of the Explanatory Notes refer to "mixed polyethylene glycols" (pages 526, 582 and 595) and "polyethylene glycol waxes" (page 525) (emphasis added). The Secretariat has some doubts whether the proposed amendments would be appropriate when qualified by the term "waxes", or when no longer qualified by the term "mixed". The Sub-Committee is invited to express its view on this issue.

13. Furthermore, in its proposed text for "mixed polyethylene glycols", Canada has dropped the reference to "mixed" reasoning that "mixed" polyethylene glycols are still 100% polyethylene glycol. The Secretariat would not favour dropping the term "mixed" as this may lead to uncertainty vis-à-vis the scope of heading 34.04 versus that of headings 38.24 and 39.07. The proposed amendments have been placed in square brackets in Annex III, pending the outcome of the discussions.

14. In Annex III to this document the amendments proposed by Canada have been reproduced, followed by the amendments adopted by HSC/23, both in square brackets.

15. The Secretariat also noted that there is some inconsistency in using singular and plural references to polyethylene glycol between the French and English versions. The Harmonized System Committee at its 23rd Session discussed the references in the French

text to “polyéthylène-glycols” and specifically, whether the name should be in the singular and without the dash. The Committee decided to maintain the “s” but to delete the “-” and have two words (see Annex F/1 to Doc. NC0090E2). Consequently the adopted subheading text of subheading 3404.20 (French version) reads : “de poly(oxyéthylène) (polyéthylène glycols)”.

16. In respect of Canada’s proposed amendments to the Compendium of Classification Opinions concerning polyethylene glycol (see item B.1 of Appendix I), the Secretariat wishes to point out that this amendment was adopted for both versions by HSC/23. However, taking into account the above-mentioned decision (see paragraph 15 above) the HSC decided to modify the expression at issue in the French version accordingly, though the report refers to “polyéthylène-glycols” (with a hyphen). Although the Secretariat could accept the Canadian proposal (i.e., to refer to “glycol” in the singular in the French version), it has placed it in square brackets, together with the text already adopted by the Committee (but duly modified by deleting the hyphen in the French version), pending the outcome of the discussions in the Sub-Committee.
17. In this context, the Sub-Committee is also invited to consider the approved amendment to subheading 3404.20 (French version) as adopted for the 2002 Harmonized System amendments (i.e., whether it should read “polyéthylène glycols” (plural) or “polyéthylène glycol” (singular, as in the English version)).

Poly(formaldehyde) – Item A.7

18. Canada has also expressed its concern in respect of the name “poly(formaldehyde)” proposed during SSC/14 and adopted by HSC/23 (Doc. NC0090B2, Annex O/6). Canada is of the view that since this is a one word source-based name which, to be consistent with other Canadian proposals accepted by the SSC, should not have brackets (parentheses) in the polymer name. The amendment adopted by the HSC reads as follows :

“Page 592. General. Item (2). Fifth line.

Delete “polymethylene oxide” and substitute “poly(oxymethylene) (poly formaldehyde)”.

19. The Secretariat has no objection to the Canadian proposal and has placed the revised proposal in square brackets in Annex III to this document.

Polyvinyl alcohols – Item A.10

20. With regard to the term “polyvinyl alcohols” (page 599), it should be noted that in the French version the term “alcools polyvinyliques” was substituted with “poly(alcool vinylique)” (singular) (HSC/21). However, the corresponding text of the English version remained unchanged (i.e., “polyvinyl alcohols” (in plural form)). The Secretariat can accept the Canadian proposal and suggests amending the corresponding English version by deleting “polyvinyl alcohols” and substituting “poly(vinyl alcohol)” (singular). This would also be in line with the amendment adopted for subheading 3905.30. The proposed amendment is reproduced in Annex III to this document.
21. The Secretariat has, however, some doubts as concerns the reference to “polyvinyl alcohols” (plural) on page 605, third paragraph, second sentence and last line (paragraphs A.11 and A.12 of Annex I) which is to be simply amended to read “poly(vinyl alcohol)”, since

this amendment, from plural to singular, will change the meaning of the whole sentence. The Secretariat is of the view that the present third paragraph of the Explanatory Note to heading 39.05 clearly sets out the term “polyvinyl alcohols” and their applications and should, therefore, be maintained unchanged. Furthermore, the HSC adopted the corresponding references to “poly(alcools vinyliques)” (plural) in the French version (HSC/21). However, the Sub-Committee may consider placing parentheses as follows “poly(vinyl alcohols)” (as in the text adopted for the French version). The texts concerned are placed in square brackets in Annex III to this document.

Nylon – Item A.16.

22. Canada considers that the use of the term “nylon” does not belong in the Explanatory Notes to heading 85.15 in the context of thermoplastic products. Furthermore, Canada indicates that the use of this term was discussed in the 1970's during the design of Chapter 39 and after considerable discussion the term was dropped. In view of this, the Secretariat would agree with the Canadian proposal to remove the term in text of the Explanatory Note to heading 85.15, Item (H) (3), as adopted by HSC/23.
23. The Secretariat has noticed that the French version of the amended text adopted by HSC/23 contains clerical errors, which require correction. The part at issue reads “(polymères acryliques, polyéthylène, poly(chlorure de vinyle), polyamide (nylon, par exemple)”. The Secretariat believes that this part should read (“polymères, acryliques, polyéthylène, poly(chlorure de vinyle), polyamide (nylon, par exemple) par exemple”), as it is in the English version. The Secretariat has reproduced a duly amended version as an alternative in Annex III, in case the Sub-Committee does not agree with the Canadian proposal to delete the reference to “nylon”.
24. The proposed texts are reproduced in Annex III to this document.

Editorial corrections.

25. In its submission, Canada also points out some editorial corrections (see paragraphs A.5 and A.9 of Annex I). The Secretariat has taken note of the omissions and will insert the corrections into the final text to be adopted by HSC/25. Consequently, they have not been reproduced in Annex III.

Other issues listed in Annex II.

26. With regard to the other items listed in Annex II (i.e., references in the French version to “esters vinyliques” (page 605), “acétals polyvinyliques” (pages 605 and 607), “éthers polyvinyliques” (pages 606 and 607), “esters polyvinyliques” (page 607), “esters polyacryliques” (page 607), “esters polyallyliques” (pages 607 and 608) and “cétones polyvinyliques” (page 611)) the Secretariat considers that these polymer names are of polymers whose unit or monomer was represented by a general term, and should, following the decision taken by SSC/14, not have been brought into conformity with the chemical nomenclature of the IUPAC. If, however, the Sub-Committee considers that the references in the French version, as adopted during SSC/13, are correct, the Sub-Committee is invited to consider the corresponding English terms as well. If not, the decisions taken vis-à-vis the French version should be withdrawn. The relevant amendments have been placed in square brackets in Annex III, pending the outcome of the discussions.

Annex IV

27. To facilitate discussions in the Sub-Committee the Secretariat has prepared a review of the decisions taken so far by SSC/13, SSC/14, RSC/17, RSC/19, HSC/21 and HSC/23 vis-à-vis polymer names. This review is reproduced in Annex IV to this document.
28. Finally the Secretariat considers that any of the amendments referred to in Canada's paper and any other amendment referred to in Annex III should, if adopted, be introduced under the Article 16 procedure and not via corrigendum procedure as suggested by Canada.

III. CONCLUSION

29. The Sub-Committee is invited to examine the proposed amendments set out in Annex III to this document, taking into account the Canadian comments reproduced in Annex I and the Secretariat's comments above.

* * *

CANADIAN PAPER ON PROPOSED AMENDMENTS TO THE EXPLANATORY NOTES
AND THE COMPENDIUM OF CLASSIFICATION OPINIONS CONCERNING POLYMER
NAMES

During the 19th Session, the Review Sub-Committee continued to examine the Canadian proposal to amend certain polymer names in the Nomenclature, the Explanatory Notes and the Compendium of Classification Opinions. During this meeting, the Canadian Delegate circulated comments concerning the SSC discussion on these proposed amendments. However, due to the lateness of these comments, the lack of a French version, and the format of the informal document, the RSC requested that the Canadian Administration re-submit these comments.

As noted in past documents, the second part of the Canadian proposal is a systematic revision of the polymer names in both French and English versions to bring them into conformity with the IUPAC chemical nomenclature. The proposal is only editorial in nature and was suggested in order to prevent problems when translating multi-word polymer names into other languages.

The SSC (14th Session) approved most of the recommendations in the Canadian proposal except for those polymers represented by a general term or in those cases where the scope of the polymer descriptions concerned might change. Although we could accept most of the SSC comments, our administration did have a few concerns which were submitted as an informal document at RSC/19.

At its 23rd Session, the Harmonized System Committee adopted Article 16 amendments to the Nomenclature, Explanatory Notes and Classification Opinions concerning polymer names (Annexes N/11 and O/6 to Doc. NC0090B1). Due to the heavy HSC agenda, our administration did not pursue modifications to the Explanatory Notes and Classification Opinions at that time, but decided to send in a paper for the next RSC session so administrations could have the opportunity to examine our editorial comments concerning Annex O/6 to Doc. NC0090B1. If the Sub-Committee agrees, these comments can be accepted by corrigendum or may wish to send them directly to the SSC due to the technical nature of the issue.

The following are our comments for the proposed editorial modifications in the attached Appendix I.

* * *

A. Amendments to the Explanatory Notes

1. Page 372.

Amendments to “polyvinyl acetals” had been approved for the French version of the Explanatory Notes to headings 39.05 and 39.07 at HSC/21 (see Annex N/5 to Doc. 42.100). Therefore, this reference should be reinserted in the English and French versions of the Explanatory Notes for consistency.

2. Page 496.

Amendments to “polyacrylic esters” had been approved for the French version of the Explanatory Notes to heading 39.07 at HSC/21 (see Annex N/5 to Doc. 42.100). Therefore, this reference should be reinserted in the English and French versions of the Explanatory Notes for consistency.

3. Page 525.

Although this reference was dropped at SSC/14, this text has the same wording as the text of subheading 3404.20 which was adopted at HSC/23 and changes to one should, for consistency, be made for the other.

4. Page 526.

The SSC accepted changes to polymers whose unit or monomer is represented by a specific term but not to polymers represented by a general term. “Mixed polyethylene glycols” are all polymers of oxyethylene and as such are represented by a monomer unit with a specific name. Thus, this reference should be reinserted and aligned on the adopted text change to subheading 3404.20. Also, the reference to “mixed” is dropped since ‘mixed’ polyethylene glycols are still 100% polyethylene glycol.

5. Page 572.

Both French and English amendments need an additional bracket at the end.

6. Page 582.

See Comment A.4, above.

7. Page 592.

The name “poly(formaldehyde)” proposed by the SSC is a one word source-based name which, to be consistent with the other Canadian proposals accepted by the SSC (and the significant number of other polymer names left unmodified), should not have brackets in the polymer name.

8. Page 595.

See Comment A.4, above.

9. Page 596.

French text only : Missing bracket at the end.

10. Page 599.

English text only :

See Comment A.4, above. Like polyethylene glycols, polyvinyl alcohols are all polymers of the theoretical monomer “vinyl alcohol” and as such are represented by a monomer unit with a specific name, not a general name. Therefore, this reference should be included and amended for consistency. The French text was already modified and accepted at HSC/21 (see Annex N/5 to Doc. 42.100).

11. Page 605. Third paragraph.

English text only : See Comment A.10, above.

12. Page 605. Fourth paragraph.

English text only: See Comment A. 10, above.

13. Page 606.

English text only :

Amendments to “polyvinyl ethers” had been approved for the French version of the Explanatory Notes to headings 39.05 and 39.07 at HSC/21 (see Annex N/5 to Doc. 42.100). Therefore, for consistency, this reference should be reinserted in the English version of the Explanatory Notes to align it on the French changes.

14. Page 607.

English text only :

Amendments to “polyvinyl acetals”, “polyvinyl ethers”, “polyvinyl esters” and “polyacrylic esters” had been approved for the French version of the Explanatory Notes to headings 39.05 and 39.07 at HSC/21 (see Annex N/5 to Doc. 42.100). Therefore, for consistency, these references should be reinserted in the English version of the Explanatory Notes to align them on the French changes.

15. Page 611.

English text only :

Amendments to “polyvinyl ketones” had been approved for the French version of the Explanatory Notes to heading 39.11 at HSC/21 (see Annex N/5 to Doc. 42.100). Therefore, for consistency, this reference should be reinserted in the English version of the Explanatory Notes to align them on the French changes.

16. Page 1467.

The use of the term “nylon” was discussed in the 1970's during the design of Chapter 39. After considerable discussion the term was dropped. Consequently, Canada proposed removal of the term in its suggested changes to the Explanatory Notes to heading 85.15 (para. 4(k) to Doc. 42.248). We still feel that the term does not belong in the Explanatory Notes to heading 85.15 in the context of thermoplastic products.

B. Amendments to the Compendium of Classification Opinions

1. Page 13a. Opinion 3907.20/1.

French text only : Align the text on the same adopted Explanatory Note changes to heading 38.11.

The proposed changes are compiled in the attached Appendix II.

Annexe II au Doc. NS0008B1
Annex to

(SCS/15/janv. 2000)
(SSC/15/Jan. 2000)

ANNEXE II

MODIFICATIONS DES NOTES EXPLICATIVES ET DU RECUEIL DES AVIS DE CLASSEMENT CONCERNANT LES POLYMERES

(Point II.7 l'ordre du jour)

ANNEX II

AMENDMENTS TO THE EXPLANATORY NOTES AND THE COMPENDIUM OF CLASSIFICATION OPINIONS CONCERNING POLYMER NAMES

(Item II.7 on Agenda)

MODIFICATIONS MENTIONNEES AU PARAGRAPHE 4 CI-DESSUS

Page 599. Note explicative de sous-positions. Note 1 de sous-positions. Alinéa A) 1).
Dernier paragraphe. Première et deuxième lignes.

Remplacer "alcools polyvinyliques" par "poly(alcool vinylique)".

Page 605. N° 39.05.

1. Deuxième paragraphe.

Remplacer "esters vinyliques" par "esters de vinyle".

2. Troisième paragraphe.

a) Deuxième ligne.

Remplacer "alcools polyvinyliques" par "poly(alcools vinyliques)".

b) Pénultième ligne.

Remplacer "alcools polyvinyliques" par "poly(alcools vinyliques)".

3. Quatrième paragraphe. Première ligne.

Remplacer "acétals polyvinyliques" par "poly(acétals de vinyle)".

Page 606. N° 39.05. Premier paragraphe.

Remplacer "éthers polyvinyliques" par "poly(éthers de vinyle)".

Page 607. N° 39.07.

1. Alinéa 1). Troisième ligne.

Remplacer "acétals polyvinyliques" par "poly(acétals de vinyle)".

2. Alinéa 2). Troisième ligne.

Remplacer "éthers polyvinyliques" par "poly(éthers de vinyle)".

3. Alinéa 5).

a) Troisième et quatrième lignes.

Remplacer "esters polyvinyliques" par "poly(esters de vinyle)".

b) Quatrième ligne.

Remplacer "esters polyacryliques" par "poly(esters acryliques)".

4. Alinéa 5) b). Première ligne.

Remplacer "**esters polyallyliques**" par "**poly(esters d'allyle)**".

Page 608. N° 39.07. Alinéa 5) d). Premier paragraphe. Quatrième et cinquième lignes.

Remplacer "esters polyallyliques" par "poly(esters d'allyle)".

Page 611. N° 39.11. Alinéa 4). Deuxième et troisième lignes.

Remplacer "cétones polyvinyliques" par "poly(cétones de vinyle)".

(SSC/15/Jan. 2000)

ANNEXE III

MODIFICATIONS DES NOTES EXPLICATIVES ET DU RECUEIL DES AVIS DE CLASSEMENT CONCERNANT LES POLYMERES

(Point II.7 l'ordre du jour)

ANNEX III

AMENDMENTS TO THE EXPLANATORY NOTES AND THE COMPENDIUM OF CLASSIFICATION OPINIONS CONCERNING POLYMER NAMES

(Item II.7 on Agenda)

PROCEDURE DE L'ARTICLE 16

A. MODIFICATIONS DES NOTES EXPLICATIVES

CHAPITRE 29.

[Page 372. N° 29.11. Alinéa A). Exclusion.]

Remplacer “acétals polyvinyliques” par “poly(acétals de vinyle)”).

CHAPITRE 32.

[Page 496. N° 32.09. Deuxième paragraphe. Première et deuxième lignes.]

Remplacer “esters polyacryliques” par “poly(esters acryliques)”).

CHAPITRE 34.

Page 525. N° 34.04. Quatrième paragraphe. Alinéa 4). Première ligne.

Remplacer “polyéthylène-glycols” par “[poly(oxyéthylène) (polyéthylène glycols)] [polyéthylène glycols]”.

Page 526. N° 34.04. Exclusion h).

Remplacer “Les polyéthylène-glycols en mélanges” par “[Poly(oxyéthylène) (polyéthylène glycols)] [Les polyéthylène glycols en mélanges]”.

CHAPITRE 38.

Page 582. N° 38.24. Alinéa 10).

Nouvelle rédaction :

- “10) [**Poly(oxyéthylène) (polyéthylène glycols)**] [**Les polyéthylène glycols**] d'un poids moléculaire très faible, par exemple les mélanges de di-, tri-, et tétra(oxyéthylène) glycols.

Les autres [poly(oxyéthylène) (polyéthylène glycols)] [polyéthylène glycols] relèvent du n° 39.07 ou, s'ils présentent le caractère de cires artificielles, du n° 34.04.”

CHAPITRE 39.

[Page 592. Considérations générales. Alinéa 2). Cinquième ligne.]

Remplacer “de l'oxyde de polyméthylène” par “du poly(oxyméthylène) (polyformaldéhyde)”).

Page 595. Considérations générales. Champ d'application des n°s 39.01 à 39.11.
Exemple e). Sixième ligne.

Remplacer “les polyéthylène-glycols en mélanges” par “[poly(oxyéthylène) (polyéthylène glycols)] [les polyéthylène glycols en mélanges]”.

[Page 599. Considérations générales. Note explicative de sous-positions. Alinéa A)1).
Quatrième paragraphe.

Remplacer “alcools polyvinyliques” par “poly(alcool vinylique)”.]

Page 605. N° 39.05.

[1. Deuxième paragraphe.

Remplacer “esters vinyliques” par “esters de vinyle”.]

2. Troisième paragraphe.

[a) Deuxième ligne.

Remplacer “alcools polyvinyliques” par “poly(alcools vinyliques)”.]

[b) Pénultième ligne.

Remplacer “alcools polyvinyliques” par “poly(alcools vinyliques)”.]

[3. Quatrième paragraphe. Première ligne.

Remplacer “acétals polyvinyliques” par “poly(acétals de vinyle)”.]

Page 606. N° 39.05. Premier paragraphe.

Nouvelle rédaction :

“Parmi les autres polymères vinyliques, on peut citer les [poly(éthers de vinyle)] [éthers polyvinyliques], le poly(carbazole de vinyle) et le poly(pyrrolidone de vinyle).”

Page 607. N° 39.07.

[1. Alinéa 1). Troisième ligne.

Remplacer “acétals polyvinyliques” par “poly(acétals de vinyle)”.]

[2. Alinéa 2). Troisième ligne.

Remplacer “éthers polyvinyliques” par “poly(éthers de vinyle)”.]

3. Alinéa 5).

[a) Troisième et quatrième lignes.

Remplacer “esters polyvinyliques” par “poly(esters de vinyle)”.]

[b) Quatrième ligne.

Remplacer “esters polyacryliques” par “poly(esters acryliques)”.]

4. Alinéa 5) b). Première ligne.

Remplacer “**esters polyallyliques**” par “**poly(esters d’allyle)**”].

[Page 608. N° 39.07. Alinéa 5) d). Premier paragraphe. Quatrième et cinquième lignes.

Remplacer “esters polyallyliques” par “poly(esters d’allyle)”).

[Page 611. N° 39.11. Alinéa 4). Deuxième et troisième lignes.

Remplacer “cétones polyvinyliques” par “poly(cétones de vinyle)”).

CHAPITRE 85.

Page 1467. N° 85.15. Alinéa H) 3).

[Nouvelle rédaction :

“3) Soudage par haute fréquence.

Les surfaces en matières thermoplastiques (polymères acryliques, polyéthylène, poly(chlorure de vinyle), polyamide, par exemple) ayant des caractéristiques de pertes diélectriques suffisantes sont chauffées à haute fréquence et soudées par pression. Des produits d’apport peuvent être utilisés.”]

OU

[Nouvelle rédaction :

“3) Soudage par haute fréquence.

Les surfaces en matières thermoplastiques (polymères acryliques, polyéthylène, poly(chlorure de vinyle), polyamide (nylon, par exemple), par exemple) ayant des caractéristiques de pertes diélectriques suffisantes sont chauffées à haute fréquence et soudées par pression. Des produits d’apport peuvent être utilisés.”]

◦
◦ ◦

B. MODIFICATION DU RECUEIL DES AVIS DE CLASSEMENT

Page 13a. Avis de classement n° 3907.20/1.

Remplacer "polyéthylène glycol" par "poly(oxyéthylène) [(polyéthylène glycols)] [(polyéthylène glycol)]".

* * *

ARTICLE 16 PROCEDURE

A. AMENDMENTS TO THE EXPLANATORY NOTES

CHAPTER 29.

[Page 372. Heading 29.11. Item (A). Exclusion.]

Delete “polyvinyl acetals” and substitute “poly(vinyl acetals)”).

CHAPTER 32.

[Page 496. Heading 32.09. Second paragraph, first line.]

Delete “polyacrylic esters” and substitute “poly(acrylic esters)”).

CHAPTER 34.

Page 525. Heading 34.04. Fourth paragraph. Item (4), first line.]

[Delete “Polyethylene glycol” and substitute “Poly(oxyethylene) (polyethylene glycol)”.] [French text only.]

Page 526. Heading 34.04. Exclusion (h).

[Delete “Mixed polyethylene glycols” and substitute “Poly(oxyethylene) (polyethylene glycol)”.] [French text only.]

CHAPTER 38.

Page 582. Heading 38.24. Item (10).

[Delete and substitute :

“(10) **Poly(oxyethylene) (polyethylene glycol)** with very low molecular weight, e.g., mixtures of di-, tri- and tetra(oxyethylene) glycols.

Other poly(oxyethylene) (polyethylene glycol) is, however, excluded (**heading 39.07** or, if having the character of artificial waxes, **heading 34.04**).]

[French text only.]

CHAPTER 39.

[Page 592. General. Item (2). Fifth line.]

Delete “poly(oxymethylene) (poly(formaldehyde))” and substitute “poly(oxymethylene) (polyformaldehyde)”).

Page 595. General. Scope of headings 39.01 to 39.11. Example (e). Fifth and sixth lines.

[Delete “mixed polyethylene glycols” and substitute “poly(oxyethylene) (polyethylene glycol)”.] [French text only.]

[Page 599. General. Subheading Explanatory Note. Item (A) (1). Fourth paragraph. First line.]

Delete “polyvinyl alcohols” and substitute “poly(vinyl alcohol)”.]

Page 605. Heading 39.05.

[1. Second paragraph.

French text only.]

2. Third paragraph.

[a) First line.

Delete “polyvinyl alcohols” and substitute “poly(vinyl alcohols)”.]

[b) Last line.

Delete “polyvinyl alcohols” and substitute “poly(vinyl alcohols)”.]

[3. Fourth paragraph. First line.

Delete “Polyvinyl acetals” and substitute “Poly(vinyl acetals)”.]

Page 606. Heading 39.05. First paragraph.

Delete and substitute :

“Other vinyl polymers include [poly(vinyl ethers)] [polyvinyl ethers], poly(vinyl carbazole) and poly(vinyl pyrrolidine).”

Page 607. Heading 39.07.

[1. Item 1. Third line.

Delete “polyvinyl acetals” and substitute “poly(vinyl acetals)”.]

[2. Item (2). Third line.

Delete “polyvinyl ethers” and substitute “poly(vinyl ethers)”.]

3. Item 5.

[a) Third line.

Delete “polyvinyl esters” and substitute “poly(vinyl esters)”.]

[b) Fourth line.

Delete “polyacrylic esters” and substitute “poly(acrylic esters)”].

4. Item (5) (b). First line.

Delete “**Polyallyl esters**” and substitute “**Poly(allyl esters)**”.]

[Page 608. Heading 39.07. First paragraph.

French text only.]

[Page 611. Heading 39.11. Item (4). Second line.

Delete “polyvinyl ketones” and substitute “poly(vinyl ketones)”].

CHAPTER 85.

Page 1467. Heading 85.15. Item (H) (3).

[Delete and substitute :

"(3) High-frequency welding.

Surfaces of thermoplastic materials (e.g., acrylic polymers, polyethylene, poly(vinyl chloride), polyamide) with reasonably high dielectric losses are heated in a high-frequency alternating field then joined under pressure. Additives may be used.”]

OR

[Delete and substitute :

"(3) High-frequency welding.

Surfaces of thermoplastic materials (e.g., acrylic polymers, polyethylene, poly(vinyl chloride), polyamide (e.g., nylon)) with reasonably high dielectric losses are heated in a high-frequency alternating field and then joined under pressure. Additives may be used.”]

◦
◦ ◦

B. AMENDMENTS TO THE COMPENDIUM OF CLASSIFICATION OPINIONS

Page 13a. Opinion 3907.20/1.

Delete “polyethylene glycol” and substitute “poly(oxyethylene) (polyethylene glycol)”.

* * *
